**Medical Terminology**

**HRS 1206.087**

**Dr. Bridgit Moore,  
EdD, MLS (ASCP)**

**NOTE: This is a 16-week, online course.**

**Course Description:**

An overview of roles of various members of the health care system, educational requirements, and issues affecting the delivery of health care.

Medical Terminology is a foundation course that teaches students the meaning and correct pronunciation of medical terms, so that they can correctly understand and communicate medical information. This course takes a systematic, word-building approach to medical terminology: students do not simply memorize a list of terms in this course—they learn how those terms are built using common word parts, so that they can correctly infer the meaning and correct spelling of medical terms, even those they have never studied. They will also learn the “sounds-like” pronunciation system that will enable them to pronounce virtually any medical term. The terms in this course are further organized by body system, so that students can observe the word parts that are common to each system. The inference skills students gain in this course will enable them to keep pace with the ever-expanding lexicon of medical terminology. Semester Hours 2 (2 lec)
