The CIS department has online, hybrid, and hyflex courses that are designed with the same standards of academic excellence as the face to face classes that meet on campus. This course is an online class, which will require more study and student effort than is usually required in a traditional face-to-face course. In order to be successful in this course, students should be willing to put in at least twice as much time as they would spend in a face-to-face section because it will require more reading, research and online collaboration. This course requires at least the same level of rigor as a traditional course and additionally requires that the student can work independently, solve problems, communicate and participate in a professional manner.

Late Work, Attendance, and Make Up Work Policies:

LINUX INSTALLATION AND CONFIG

ITSC 1316-01

Students will be permitted to make up class work and assignments missed due to absences caused by (1) authorized participation in official College functions, (2) personal illness, or (3) an illness or a death in the immediate family. It is the instructor's prerogative whether a student may make up work missed due to absences for other reasons. It is the student's responsibility to inform the instructor of the reason for an absence and to do so in a timely fashion. Moreover, it is the student's responsibility to keep up with missed material. Finally, due dates will not be modified by absences. Due dates will be clearly shown on each assignment.

This course will be conducted as a "hyflex" class. What does that mean exactly, and how does that impact you as a student? It means that you will have several options for "attending" the course, such as:

In Person. Come to class, as you would for any other regular class.

Zoom. Log into Zoom using the link provided under content in the Zoom section on Brightspace to attend class via Zoom during class hours.

Online. On your own time. (No trips to campus required)

Regardless of the class attendance option(s) you choose, you must submit work by its deadline each week. Attendance will be taken via weekly discussion posts. All tasks must be completed by all students regardless of attendance method unless indicated otherwise in each topic's link.

Whatever choice you make for attendance is not set for the remainder of the semester. For example, you may attend a class session on campus on the first class day of the week but choose to complete assignments on your own instead of attending the second class day of the week. In other words, the choices are up to you each week; however, I would urge you to consider how you learn best as a student in making this decision. Students often work best by establishing a steady, regular routine.

Student Behavioral Expectations or Conduct Policy:

To be successful in this class it is **crucial** that you as the student carry through with your responsibilities of learning and applying the material. Key to this is:

- A. Read, understand and abide by the Syllabus;
- B. Check MCC student email daily;
- C. Keep up with the readings, complete the assignments, and take the chapter quizzes on time;

LINUX INSTALLATION AND CONFIG

ITSC 1316-01

- H. Be professional, courteous and respectful to the instructor and to each other.
