Petree	50.00	This course requires participation in both online course content and skill training to include anatomy and physiology of the circulatory system, specimen collection procedures, specimen processing and handling, and laboratory operations (e.g. safety, quality control, etc.). Students will acquire and demonstrate phlebotomy skills both virtually and in a student laboratory setting on campus. Times to be arranged. In order to demonstrate basic phlebotomy skills, students will be required to participate in a competency evaluation on campus during the week of November 27 - December 1. Evaluations will be held in room Science 327 on Tuesday/Thursday from 8 AM - 4 PM and Friday from 1 PM - 5 PM. Students will be asked to sign-up for specific time slots based on their availability. Students should expect to spend a minimum of 4 hours in competency evaluation during this week. More hours may be required to reach entry level competency.
